

## **COYOTE WEAPON SIGHT**

### **Mini Uncooled Thermal Weapon Sight**

The COYOTE WEAPON SIGHT is a very light weight high-performance uncooled thermal weapon sight that significantly boosts the warfighter's round-the-clock, allweather-condition capabilities.

Whether hand-held or weapon-mounted, the COYOTE WEAPON SIGHT enables the warfighter to see but not be seen, as it doesn't emit any light or RF energy.

- Interfaces with all existing peripheral equipment
- Ideal for military and para-military forces

- »» High-resolution 320x240 array
- »» Battery-operated
- »» Ruggedized metal enclosure
- »» High survivability
- »» Fits Picatinny-type weapon adapter

# COYOTE WEAPON SIGHT

## Technical Characteristics

### Optics & Sensors

<b>Sensor</b>	Uncooled microbolometer
<b>Resolution</b>	320x240 array
<b>Field of view</b>	15 x 11.3
<b>Focus Method</b>	Manual

### Electrical

<b>Power source</b>	Four CR2-type batteries
<b>Operating Time</b>	5 hr continuous

### Video

<b>Video Output</b>	PAL or NTSC Composite Video (RS-170/SMPTE-170)
---------------------	---

### User

<b>Controls</b>	<ul style="list-style-type: none"><li>● ON/OFF</li><li>● E-Zoom X2</li><li>● Polarity</li><li>● Brightness/Contrast/Gain</li></ul>
-----------------	--

### Communication

<b>Serial</b>	RS-232
---------------	--------

### Physical

<b>Dimensions</b>	120 x 30 x 40 mm
<b>Weight</b>	380gr

### Environmental

**Complies with MIL-STD-810**
