

TRISIGHT

Multi-Purpose X3 Telescopic Aiming Sight

TRISIGHT is a compact, light-weight X3 telescopic aiming sight and magnifier for extending the shooting range under daylight conditions. The device supports both reticle pattern and reticle-less configurations.

TRISIGHT is weapon-mounted by means of a convenient quick mount/release mechanism, without the use of any tools or adapters. When mounted, it can be easily flipped in and out of the line of sight according to operational needs.

TRISIGHT as a reticle pattern aiming sight is used in a stand-alone configuration.

When mounted in series with reflex sights such as ITL's MARS and RAPTOR, it magnifies the target scene without the need to boresight, for added combat value.

- Integral mounting adapted to a variety of weapon rails (including Picatinny-type)
- Ideal for tactical field commanders, special forces, forward observers, law enforcement and security operations.

- »» Accommodates a variety of sights
- »» Efficient light transmission
- »» Multiple reticle patterns
- »» Versatile weapon mounting
- »» Flip-away mechanism
- »» Ruggedized MIL-STD-tested

TRISIGHT

Technical Characteristics

Optical

Magnification	X3 ± 3%
Focus	50 m to infinity
FOV	8° ± 1°
Exit Pupil	8 mm
Eye Relief	40 mm
Adjustment Range	+2 to -3 (diopter)

Boresight (for reticle pattern configuration)

Increment Size	0.2 mrad (in Az and El)
Retention	< 0.2 mrad after 500 rounds

Physical

Dimensions	110 (L) x 33 (W) x 65 (H) mm
Weight	185 gr

Environmental

MIL-STD-compliant (MIL-STD-810F, MIL-HDBK-454)

Special Features

Reticle Configurations

Reticle-less, reticle pattern

Weapon Mounts

Variety available, including Picatinny-type

Easy Flip-in/Flip-out Mechanism

Versatile weapon mounting

Stand-Alone X3 Trisight
